

Aingeal))

Surveillance Monitor Electrode

The Surveillance Monitor Aingeal Electrode provides the clinician with clear, high quality ECG & Respiration waveforms and skin temperature which can be viewed using the Surveillance Monitoring System.

The Electrode is a disposable, pre-gelled, self adhesive patch which is applied to the left and right side of the abdomen.

Technical specifications:

CE Class I compliant to the Medical Devices Directive 93/42/EEC

FDA Class II compliant

Up to 72hr continuous wear

Bio-compatible materials compliant with: ISO 10993-5 (sensitization & irritation) & ISO 10993-10 (cytotoxicity)

ECG & Respiration signals

Skin temperature monitoring

Shelf life of 18 months (unopened)

RoHS - Compliant

Transport and storage conditions

Temperature 0 to 40°C (-32 to 104°F)

Relative Humidity 5 to 95% (non-condensing)

Altitude -382 to 5,575 m (-1,253 to 18,280 ft)

Electrical testing:

DC Offset < 2mV

AC Impedance <5Ω

Noise <5μV

Defibrillation recovery <15mV at <0.5mV/s

Bias current tolerance over 8 hours of <5mV

Compliance with the regulations of AAMI EC12:2000/(R) 2010 and FDA Class II Special Controls Guidance for ECG Electrodes

Order codes:

Electrode Arrays per pack 4

Packs per Box 25

Order Code (25 packs): 2066502-027

Order Code (100 packs): 2066502-028

(Note: The minimum order is 25 packs)
